

# Chef Revival® Semi-Disposable Cleaning Cloths

Designed to help foodservice professionals reduce cross-contamination in high-risk areas by ensuring cleaner and safer surfaces

## Why Chef Revival® Semi-Disposable Cleaning Cloths?

### They Will:

- Withstand hundreds of uses throughout the day with a simple rinse
- Work in conjunction with many non-chlorinated disinfectants, including Quat
- Handle machine washing up to 20x
- Be ideal for dusting and damp cleaning of surfaces

Item #	Description	Pack
97186	SEMI-DISPOSABLE MICROFIBER CLOTHS 12" x 12"	4 - 50ct. BOXES

## Cost Effective with Improved Cleaning Performance

The Chef Revival® semi-disposable microfiber cloths will last longer than traditional cotton terry towels making them an economical alternative for cleaning. Since microfibers trap more dirt and dust particles than cotton or disposable wipes, they don't need as much costly cleaning product making clean-up easy and fast.

## Microfiber: Pathogen, Bacteria & Virus Prevention

Microfiber cloths are an amazing cleaning tool. They are the only cleaning towel that physically removes pathogens, bacteria, viruses, and other microbes from your surfaces and traps them within its fibers leaving the surface clean and dry. Unlike cotton towels or paper wipes, microfiber is made of non-organic polyester/polyamide material, greatly reducing the risk of cross-contamination and transfer.
